A. General Information

HIV/AIDS Status

Figure 2A.1: HIV/AIDS Status of Respondents (N=430)

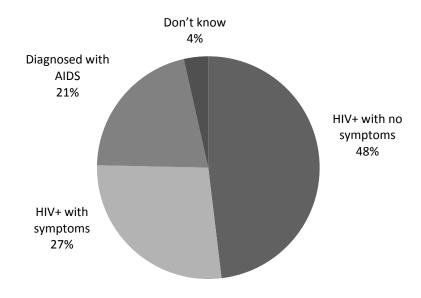

Table 2A.1: Length of Time Since HIV/AIDS Diagnosis

Years	HIV Infection (N=431)	AIDS Diagnosis (N=86)
0-1	18%	33%
2-4	19%	19%
5-9	29%	26%
10-14	17%	13%
15-19	11%	7%
20+	5%	3%
Total	100%	100%

Figure 2A.2: Respondents Living in Louisiana At Time of HIV Diagnosis (N=445)

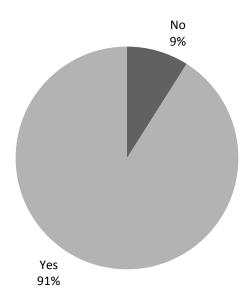

Table 2A.2: Place Where Respondents Were Told of HIV Diagnosis

Location	Number	Percent
HIV/AIDS CBO	30	7%
Hospital/ER	132	30%
Local health center	112	26%
Doctor's office	97	22%
Organization that provides other services	14	3%
Other	53	12%
Total	438	100

Background Characteristics

Figure 2A.3: Gender of Respondents (N=435)

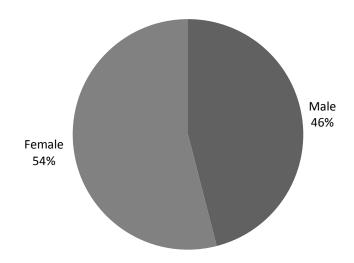

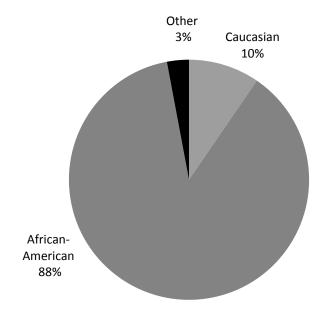

Figure 2A.4: Race of Respondents (N=440)

• 9 out of 393 (2%) respondents consider themselves to be Latino/a/Hispanic

Figure 2A.5: Age of Respondents (N=434)

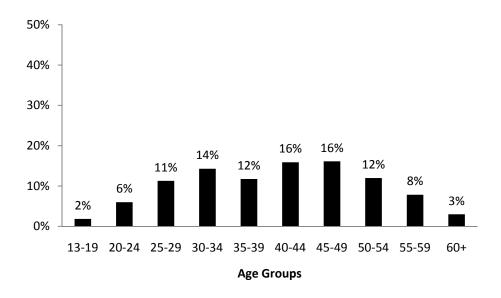

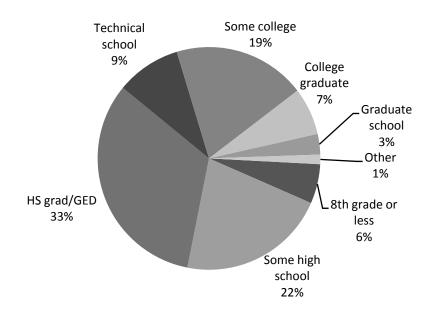

Figure 2A.6: Highest Level of Education Completed by Respondents (N=436)

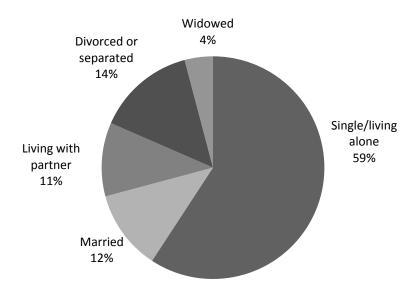

Figure 2A.7: Current Marital Status of Respondents (N=439)

Language Preference

Figure 2A.8: Language Preference of Respondents

• All but one respondent said English was their preferred language

Citizenship of Respondents

- 434 out of 440 (99%) are United States citizens.
- All respondents who reported not being United States citizens are living in the United States legally.

B. Health Insurance, Employment, and Income

Health Insurance

Figure 2B.1: Health Insurance Needs and Services Used

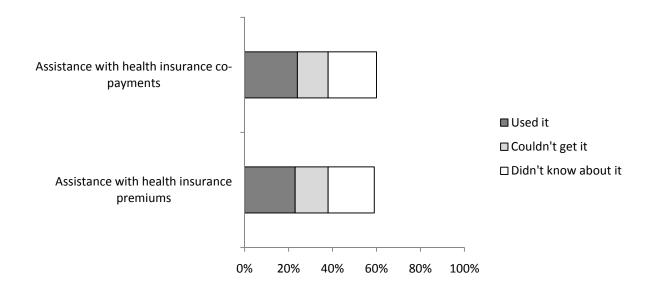

Table 2B.1: Health Insurance Needs and Services Used

Services	Used service	Couldn't get service	Didn't know about service	Didn't need service	N
Assistance with health insurance copayments	24%	14%	22%	40%	275
Assistance with health insurance premiums	23%	15%	21%	42%	302

Figure 2B.1a: Health Insurance Needs and Services Used, African-American Males

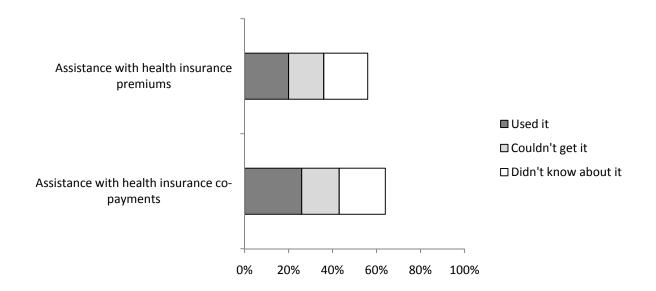

Table 2B.1a: Health Insurance Needs and Services Used, African-American Males

Services	Used service	Couldn't get service	Didn't know about service	Didn't need service	N
Assistance with health insurance premiums	20%	16%	20%	44%	109
Assistance with health insurance copayments	26%	17%	21%	37%	101

Figure 2B.1b: Health Insurance Needs and Services Used, African-American Females

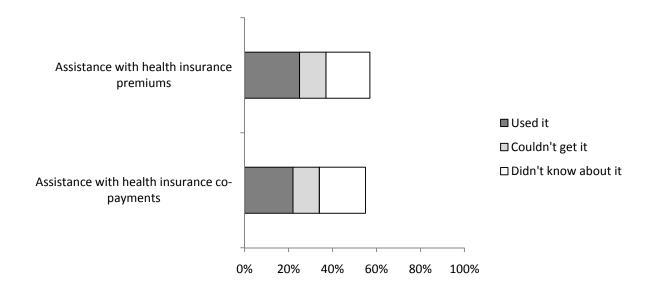

Table 2B.1b: Health Insurance Needs and Services Used, African-American Females

Table 2C.1d: Need and Use of HIV/AIDS-Related Medical Services in the Last Six Months, White Females

[Too few responses to this question.]

Figure 2C.2: Barriers to HIV/AIDS-Related Medical Services in the Last Six Months (N=227)

Note: Respondents were permitted to select more than one category, or not answer the question at all; the sum of all categories, therefore, may not meet or may exceed 100%.

Categories reporting 0% response are not included in the figures.

Figure 2C.2a: Barriers to HIV/AIDS-Related Medical Services in the Last Six Months, African-American Males (N=87)

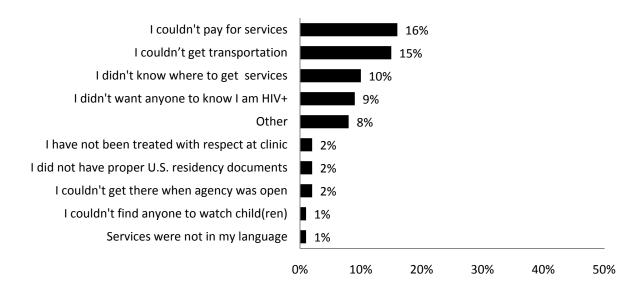

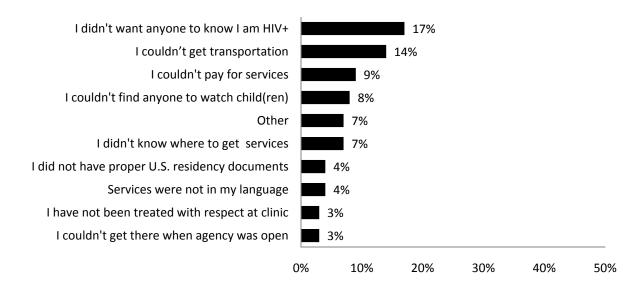

Figure 2C.2b: Barriers to HIV/AIDS-Related Medical Services in the Last Six Months, African-American Females (N=100)

Note: Respondents were permitted to select more than one category, or not answer the question at all; the sum of all categories, therefore, may not meet or may exceed 100%.

Figure 2C.2c: Barriers to HIV/AIDS-Related Medical Services in the Last Six Months, White Males

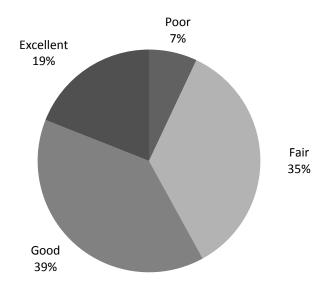

[Too few responses to this question.]

Figure 2C.2d: Barriers to HIV/AIDS-Related Medical Services in the Last Six Months, White Females

[Too few responses to this question.]

Overall Health

Figure 2C.3: Self-reported Overall Health Status (N=439)

Health-Seeking Behavior

Figure 2C.4: Time From HIV Diagnosis to HIV/AIDS-Related Medical Care (N=427)

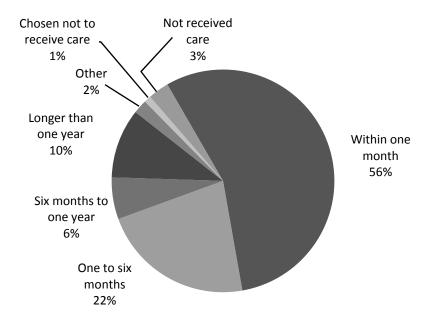

Figure 2C.5: Have Sought HIV/AIDS-Related Medical Care in Last Six Months (N=426)

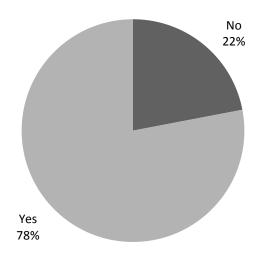

Figure 2C.6: Level of Medical Care Received by Respondents (N=317)

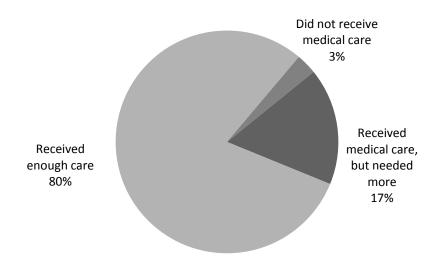

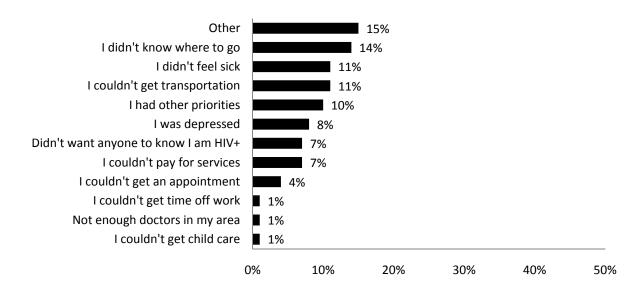

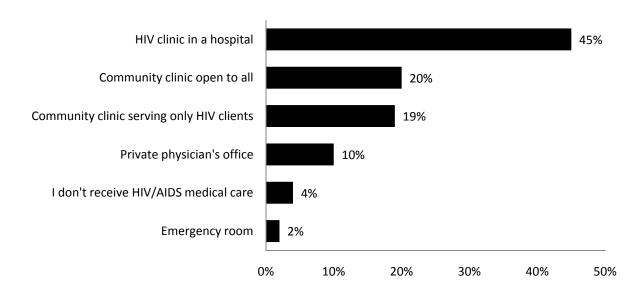

Figure 2C.7: Reasons for Not Seeking HIV/AIDS-Related Medical Care in the Last Six Months (N=71)

Categories reporting 0% response are not included in the figures.

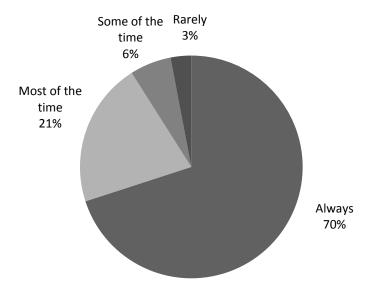

Figure 2C.8: Places Where Respondent Regularly Receives HIV/AIDS-Related Medical Care (N=420)

Note: Categories reporting 0% response are not included in the figures.

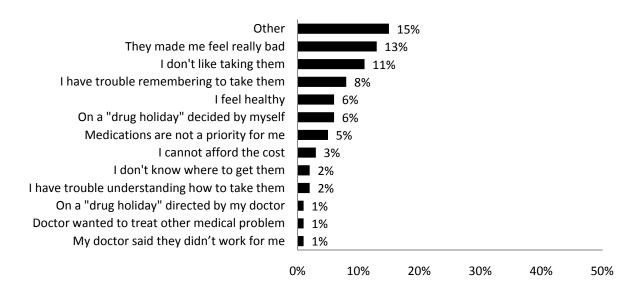

Medication Adherence

Figure 2C.9: Adherence to Medications Prescribed by Doctor (N=336)

• 91 out of 427 (21.3%) of respondents reported they have not been prescribed medications.

Figure 2C.10: Reasons for Not Taking HIV/AIDS Medications (N=102)

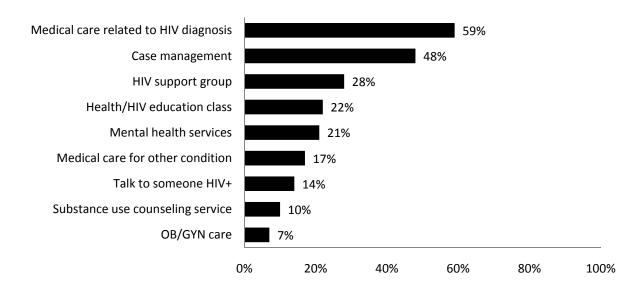

Note: Respondents were permitted to select more than one category, or not answer the question at all; the sum of all categories, therefore, may not meet or may exceed 100%.

Categories reporting 0% response are not included in the figures.

The percentages in this figure exclude those respondents who indicate in survey question 22 and 23 that they have not been prescribed medications and those who indicate in question 22 that they always take their medications as prescribed.

Referrals to Other Medical Services

Figure 2C.11: Service Referrals at the Time of HIV Diagnosis (N=414)

Note: Respondents were permitted to select more than one category, or not answer the question at all; the sum of all categories, therefore, may not meet or may exceed 100%.

Categories reporting 0% response are not included in the figures.

^{*}Eight percent of all respondents (n=450) reported not being referred to services at the time of HIV diagnosis.

Out of Care

Figure 2C.12: HIV Positive for Five Years or More (N=429)

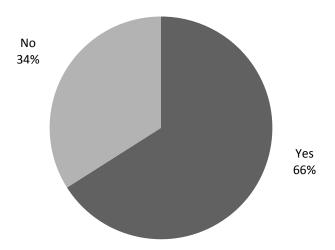

Figure 2C.13: Percentage of Respondents HIV Positive for At Least Five Years Who Have Been Out of Treatment for at Least 12 Months (N=269)

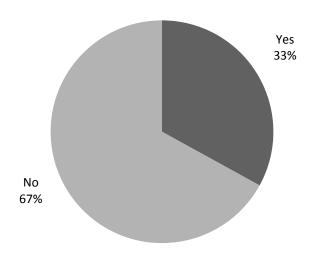

Figure 2C.14: Reason for Being Out of Care (N=86)

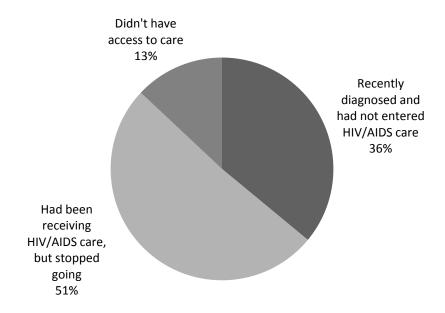

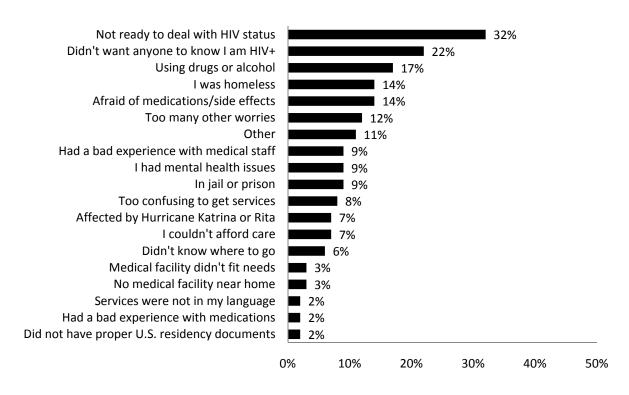

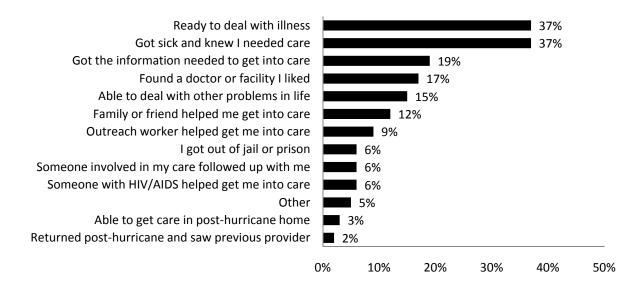

Figure 2C.15: Barriers to Receiving HIV/AIDS-Related Medical Care (N=103)

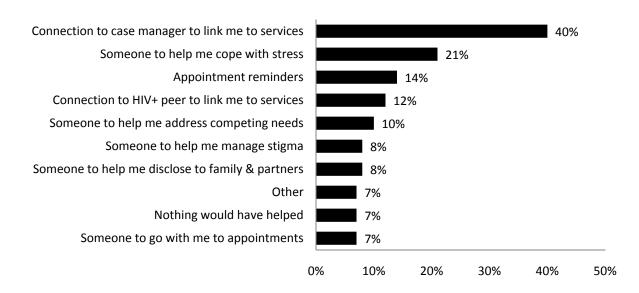

Note: Respondents were permitted to select more than one category, or not answer the question at all; the sum of all categories, therefore, may not meet or may exceed 100%. Categories reporting 0% response are not included in the figures.

Figure 2C.16: Reasons for Getting Back Into Care (N=99)

Categories reporting 0% response are not included in the figures.

Figure 2C.17: Assistance That Would Have Helped Respondent Get Back Into Care (N=284)

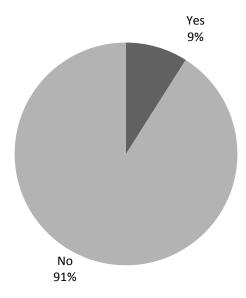

Note: Respondents were permitted to select more than one category, or not answer the question at all; the sum of all categories, therefore, may not meet or may exceed 100%.

Categories reporting 0% response are not included in the figures.

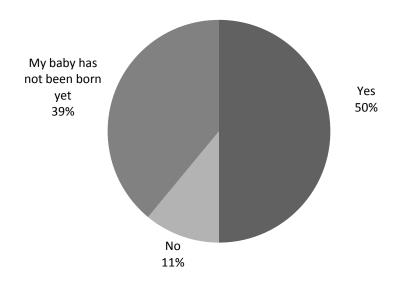

Pre- and Post-Natal Care

Figure 2C.18: Females Who Are Pregnant or Have Been Pregnant in the Last 12 Months (N=230)

• 16 of the 20 (80%) females who have been pregnant received medication to prevent transmission of HIV to their child.

Figure 2C.19: Medical Care for Newborn Child (N=18)

Other Medical Conditions

Table 2C.2: Percentage of Respondents Who Have Been Diagnosed With and Are Receiving Treatment for Other Medical Conditions in the Last Six Months

Condition	% diagnosed (N=450)	% treated	N
Sexually transmitted disease	10%	90%	39
Hepatitis A or B	6%	54%	24
Hepatitis C	14%	64%	50
Tuberculosis	2%	89%	9
